## ORAL DEFENSE RECOMMENDATION SHEET

This thesis, entitled **Mobile Phone Application for Measuring Air Parameters in Getting Discomfort Index and Amount of Air Pollutants with the Use of a Microcontroller-based System**, prepared and submitted by thesis group, ESG-04, composed of:

CHEONG, Junlae  
NIHALANI, Rohit P.  
PAULINO, Noel B.  
PO, Ryback Tyrone G.

in partial fulfillment of the requirements for the degree of **Bachelor of Science in Computer Engineering (BS-CPE)** has been examined and is recommended for acceptance and approval for **ORAL DEFENSE**.

## THESIS APPROVAL SHEET

This thesis entitled **Mobile Phone Application for Measuring Air Parameters in Getting Discomfort Index and Amount of Air Pollutants with the Use of a Microcontroller-based System**, prepared and submitted by:

CHEONG, Junlae  
NIHALANI, Rohit P.  
PAULINO, Noel B.  
PO, Ryback Tyrone G.

with group number ESG-04 in partial fulfillment of the requirements for the degree of **Bachelor of Science in Computer Engineering (BS-CPE)** has been examined and is recommended for acceptance and approval.

### PANEL OF EXAMINERS

## ACKNOWLEDGMENT

65

66

Write this prior to hard binding if you have submitted all requirements and are told by your adviser that you have passed.

67

## ABSTRACT

68

Keep your abstract short by giving the gist/nutshell of your thesis.

69

*Index Terms*—alloy system, characterization, InP, InGaAs.

## 1.1 Background of the Study

There has been many reasons why one tries to avoid any outdoor activity but one of these is how the air feels whether it is too hot or too polluted or even both. One undeniable fact is that heat and humidity all play roles in making the weather hot. Both of these weather parameters are involved in the calculation of the heat index and the discomfort index.

Heat index and discomfort index have their similarities because the factors that affect these two are the temperature and the relative humidity. The heat index is the perceived temperature by people when the rising temperature and the relative humidity is combined.

The unit used here is a unit of temperature and the mathematical formula for computing the heat index shows a rather direct square proportionality with the temperature and the humidity. But when it comes to a more human readable scale, reaching 34 degrees Celsius is already a discomfort to some. Reaching at least 46 degrees Celsius is already dangerous to all as this can cause heat stroke and even imminent death to some people. The discomfort index is similar to the heat index but instead, its mathematical formula only indicates a direct proportionality with the temperature and the relative humidity. The scaling is rather similar to that in the heat index. When the discomfort index reaches at least 21 degrees Celsius, it is already a discomfort for some people. Reaching 29 degrees Celsius is already dangerous to all that when it even gets higher, a state of emergency can be declared.

The human body is capable of regulating body temperature because of its abilities as a warm-blooded organism. When the human body detects extreme temperatures, it drastically adjusts the body just to get the internal temperature back to a normal 37 degrees Celsius. When your body detects a lot of heat, it tries to cool itself down by increasing your heart rate and sweating. However, one can sweat too much, he feels drained by the lack of fluids

266 in his body causing discomfort, weakness, loss of stamina, and even muscle pains, leading  
267 to a heat stroke.

268 Other than high temperatures and humidity, the pollutants in the air can be harmful to the  
269 respiratory system. Dust is a particle suspended in the air and it usually comes from the soil  
270 or the pollution. This can cause irritation in the respiratory system because dust entering  
271 the lungs can cause serious complications. This is already bad for those with respiratory  
272 problems such as asthma or emphysema. Carbon monoxide, however, is a colorless and  
273 odorless gas and it usually comes from smoke. When this is inhaled, it can cause serious  
274 complications in the body since this inhibits the delivery of oxygen from the blood to the  
275 other organs in the body which can cause death. Not only do all of this increase the risk of  
276 getting sickness but these also affect the visibility of an area.

277 This study will focus on a mobile application that enables people to have a foresight on  
278 how the outside air feels like. A microcontroller-based system will be used in detecting the  
279 parameters stated above while the mobile application will take note of the visibility with  
280 the use of the phone's camera.

## 281 1.2 Prior Studies

282 Some of the studies that the group has found are about the temperature and humidity  
283 monitoring systems. The temperature system can be constructed by using a simple  
284 microcontroller-based system with an important tool, the LM35 where the output voltage is  
285 directly proportional to the temperature detected. The same procedure can be done with  
286 the humidity sensor but this time, it does not make use of the LM35. Both of these sensors  
287 are good for agricultural applications and getting the air quality. Another study involves

the use of PM10 sensors in order to detect particulate matter that is 10 micrometers wide. An algorithm has been made with the use of the atmospheric reflectance for temporal monitoring. Another study introduces another concept of air monitoring by taking note of the pollutants present which are namely carbon monoxide, PM 2.5 , and ozone which make use of the MQ-7 4 sensor, MQ-131 sensor, and Sharp dust sensor respectively. Another study made use of getting the discomfort index by using temperature, humidity, atmospheric pressure, and carbon dioxide sensors. Finally, a study states the standards set by different parts of the world when it comes to the air quality. These standards all make use of the amount of pollutants present in the air as basis of air quality.

### 1.3 Problem Statement

Though there have been mobile applications that display the weather in real time, none have been able to show the discomfort index given the data. Also, there are no applications that tell the amount of dust or carbon monoxide in the air considering that these are some important factors when people choose to commute by an ordinary jeepney or do any outdoor activity in urban areas.

The aim of this study is to develop a new mobile application that is able to report the condition of the air such as weather parameters and the amount of pollutants present. The system will make use of a microcontroller along with different sensors that will measure the said parameters. Also, the mobile application will make use of computer vision to measure the visibility in an area.

Can a mobile application be developed to report real time conditions of the air and the amount of pollutants present with the used of a sensor-based microcontroller system?

310

## 1.4 Objectives

311

### 1.4.1 General Objective(s)

312

To design and develop an indoor/outdoor system for getting the discomfort index of the air...;

313

314

### 1.4.2 Specific Objectives

315

1. To make use of the temperature, humidity, amount of dust, amount of carbon monoxide, and visibility in calculating discomfort index and measuring pollutants

316

317

2. To utilize different sensors for temperature, humidity, dust, and carbon monoxide measurement

318

319

3. To gather apparent information on the discomfort regarding heat and air pollution with the use of crowd sourcing

320

321

4. To make use of computer vision with the use of a cellphone camera to measure visibility

322

323

5. To achieve a social impact on the conditions and quality of the air for the people in urban areas where smoke is present and abundant

324

325

## 1.5 Significance of the Study

326

The significance of this topic is to be able to design and produce a device of checking the air quality and discomfort index for the public health awareness. There are millions of

327

328 commuters in the Philippines riding jeepneys or light rail transit system. The problem of  
329 this way of commuting is the air because there are a lot of old vehicles producing smoke and  
330 most people just breathe in either direct or indirect way. It is very important for the people  
331 to know the status of the air to secure their respiratory health. Together with this, the group  
332 aim to the user friendly device that anyone can easily understand how to use the device  
333 through an android application. Since a lot of people uses android mobile phones, making  
334 an application for free will be very helpful. The application will display the required data  
335 in graphics so that it is easy to understand for the public and to make the aware of the effect  
336 of the environment to their health. This study will surely help a lot of people who still dont  
337 know about why it is important to know the air we are breathing outside.

## 338 1.6 Assumptions, Scope and Delimitations

- 339 1. The given data will only be determined by the air quality index and the discomfort  
340 index.
- 341 2. The application will be used only for displaying the data gathered in the device.
- 342 3. People should be able to know the importance of their respiratory system in the body.
- 343 4. Users must aware the connection between air pollution and lung cancer.
- 344 5. The device will only deal with the common factors for discomfort such as temperature,  
345 humidity, and the amount of dust in the air.

## 1.7 Description and Methodology

A device for checking air quality and discomfort index can be functional through the use of the electronic sensors attached in the circuit and sensors for dust, humidity, and temperature will provide the data for air quality index and discomfort index. The device will be user friendly so that anyone can easily control and use it for the given purpose. The goal for this project is to come up with a device and android application for air quality and discomfort index which will provide data related to the health of the public. Challenges to this project would be the design of the circuit with indicated sensors and the accuracy of the data gathered by the device. The size of the device matters because it has to be user friendly and this will be designed for the typical citizens like commuters. The prototype test would determine if it has accurate data and user friendly in general. Android application will be supporting the device as a method of health awareness. the application will be able to show the data gathered in the device and show the effect of air quality index and discomfort index for respiratory health. The information is also one of the important part because people must know why it is important to know the air quality and their discomfort level. The information from the Arduino will be passed on to the HC-06 Bluetooth module in order to relay the information to an Android phone. With the use of crowd sourcing, any Android phone can update the discomfort index and other information from the sensors that will be stored in a firebase database and another phone can access these data.

## 365 1.8 Estimated Work Schedule and Budget

## 366 1.9 Overview

367 In the first chapter, it will be helpful for readers to understand what is the purpose of  
 368 making the device and android application and why it is important for the society. It also  
 369 shows how the project will be implemented in the real world from the hypothesis. For the  
 370 second part of the paper, there will be a lot of helpful literature related to the air quality,  
 371 discomfort index, respiratory health, prevention of lung cancer, effect of dust to the human  
 372 body, circuit design for humidity, dust, and temperature sensors. These literature will guide  
 373 the group what is the right way to develop a project and make it functional in order to fulfill  
 374 the standard of the public. Theoretical considerations will be the key part to determine  
 375 the data gathered from the device because there are theoretical standards in other research  
 376 to know what are the air quality and discomfort index. Considering the design, it will be  
 377 fully electronic design because the implementation in the hardware will be using electronic  
 378 circuits. methodology will introduce how the data is gathered in the device and represented  
 379 to the users. result and discussion will be providing the user feedback and the actual data  
 380 given by the device in real situation. The value of this project will be determined in the

De La Salle University

381 conclusion based on all the provided data and actual simulation. It is the most important  
382 part to prove how this project fulfilled its purpose for the public health awareness.

There are several existing studies or researches about different kinds of applications of air parameters. Most of the studies found relating to these parameters are temperature, humidity, temporal, wireless air quality and discomfort index monitoring systems and air quality standards.

## 2.1 Temperature Monitoring System

An important parameter, not only in the air but also in everything, is the temperature. It is very important to monitor temperature of objects because most objects are sensitive to changes in the temperature such as products and some machines. Some existing researches of temperature monitoring system are found in the field of agriculture. Recent studies [Chavan and V.Karande, 2014] shows how important data-acquisition systems in the agriculture through environmental monitoring. Environmental monitoring refers to the gathering of data of some parameters in the environment that may affect the products. Automated measurements are beneficial because gathering of data and measurements are made several times. Chavan and Karande have developed a system for wireless monitoring of soil moisture, temperature and humidity in the field of agriculture. The system uses a temperature sensor, humidity sensor and soil moisture sensor that are connected to an AVR microcontroller. It also uses GSM-Zigbee based remote monitoring and control system. The application of Zigbee to the monitoring system in the agriculture reduces human power and enables to evaluate some accurate changes that will happen.

Aside from the agricultural implementation of temperature monitoring, there are also existing studies that involves its application to automated systems for electronic devices or appliances. [Mohamed Abd El-Latif Mowad, 2014] designed a smart home automated

control system. The system uses a microcontroller for sensors and android application for the transmission of data and the receiving of data. One of the four major fields of the smart home system or SHS is the environmental monitoring, which includes the monitoring of the humidity and the temperature. The main components used in the system are microcontroller, adruino board, android and a bluetooth module. Wireless internet services are also used for several monitoring and controlling processes. The passive infrared sensors are capable off detecing movements of a human being through sensing the changes in the temperature over the scene. The SHS also uses LM35 temperature sensor for the Temperature sensing system for Air Conditioner. The system can transfer data from the sensors to the android phone. On the same way, it can transmit data or commands from the android to the appliances. The wireless monitoring of temperature allows the user to control electronic devices or appliances from anywhere in the world.

## 2.2 Humidity Monitoring System

Humidity is always associated with temperature. It plays an important role to human due to the skin being sensitive to the changes in humidity. This is also the reason why humans sweat. Not only humans are affected by the changes in the humidity in the air but also applies to the things related to the field of agriculture.

A group of researchers [Aji Hanggoro and Sari, 2013] designed a green house monitoring and controlling system using an android mobile application. The system can control the humidity inside a green house, based on the readings of the humidity sensor through the microcontroller which is connected to the central server and can be accessed through Wi-Fi connection. The system is consists of humidity sensor, Arduino UNO microcontroller,

438 serial communication, wireless connection and a computer. The data from the sensor  
439 will be transmitted to the microcontroller and transferred to the computer through serial  
440 communication. The computer will transmit the data to the android phone via wireless  
441 connection and the android phone can now control the system depending on the commands  
442 that will be selected. The android can receive data from the humidity sensor, send data  
443 for water sprayer to turn on, send data for stepper motor to work and other commands  
444 that the system is capable of doing. This system ensures the condition of the green house  
445 environment to be in good condition.

446 Other than agricultural applications, studies also shows how air quality such as tem-  
447 perature and humidity affects the health of a human being. Indoor air quality or IAQ is  
448 an important factor that may affect the level of comfort and the health of the people. This  
449 may increase the discomfort index of a human being which may result to difficulties in con-  
450 centration or even headaches. [Folea and Mois, 2015] develop a wireless battery-powered  
451 system for online ambient monitoring. The system has the ability to monitor temperature,  
452 humidity, carbon dioxide level, absolute pressure and intensity of light in the indoor spaces.  
453 The data gathered can be sent through a computer for visualization and can send SMS for  
454 alarms. The system has sensors such as ambient, temperature, humidity and many more  
455 sensors to evaluate the indoor air quality. Wi-Fi connection is used as a data transmission,  
456 from the sensors to the computer, due to the fact that Wi-Fi can be found in almost every  
457 home. The study of indoor air quality will help prevent or solve issues that may affect the  
458 health and the performance of the people.

## 2.3 PM<sub>10</sub> Temporal Monitoring

PM<sub>10</sub> or particulate matter that have a diameter of 10 micrometers wide which are classified under fine particles. One study [Wong et al., 2007] used an internet protocol camera to observe real time changes in the amount of particles found in the air. The camera points to a reference location and the still images were divided into the RGB bands.

They developed an algorithm which makes use of the atmospheric reflectance and the concentration of the PM<sub>10</sub> using regression. The amount of reflectance is measured using a spectroradiometer and the concentration of the particles are determined by the different RGB bands of the camera. The PM<sub>10</sub> and the atmospheric reflectance are found to be linearly related through using the skylight parameter model, which utilizes the sun's radiation. The results produced were compared to a DustTrak meter and provide a high correlation coefficient of .78.

## 2.4 Wireless Air Quality Monitoring System

A study [Reilly et al., 2015] monitored the amount of different air pollutants using Arduino. The pollutants that are measured are carbon monoxide, PM<sub>2.5</sub>, and ozone which make use of the MQ-7 sensor, MQ-131 sensor, and Sharp dust sensor respectively. The sensors are mounted onto a redboard as well as GSM shield to send data wirelessly. The sensors are calibrated using a co-located ADEQ (Air Quality Division) sensor and were validated. The device is placed around the metro area and the data collected will be compared to a monitoring station. Data was collected for a period of time and a trend was found in CO and ozone levels. However, the use of the Sharp dust sensor was not very effective but could find slight differences at high pollution times with low pollution times.

Another similar study [Hebbar et al., 2014] of an air monitoring device is implemented using a microcontroller where several sensors are placed and data is sent through GSM wirelessly. The design tests the amount of CO<sub>2</sub> levels indoors. It also measures the temperature and humidity of the atmosphere locally. Calibration of the sensors is done by concentrating known amount of a certain gas into a test chamber and determine its offset from the results obtained. The design was tested in a seminar hall and the results obtained showed that the start and end of each class attributed to the increase in CO<sub>2</sub> emission. The design also shows the data through an online GUI.

One similar design, called HazeWatch, is done using several sensors and cloud computing [Hu et al., 2016]. The design is made compact and portable and can be mounted onto a car or bike. Data is harvested using a mobile phone and records the location in real time. Data is then sent wirelessly to cloud-based servers and is interpolated (Inverse Weighing and Ordinary Kriging interpolation) to generate estimates. The data can then be view visually using contour maps of the pollution or gas concentration levels in the area. The results obtained are compared to similar products (*Node* and *SensorDrone*)

## 2.5 Discomfort Index Monitoring System

A research was made about the importance of monitoring and controlling of atmospheric conditions to the efficiency of the performance of the human beings [Noh et al., 2013]. They designed a wireless sensor module that uses a Zigbee communication and sensor module, which consists of temperature, humidity, CO<sub>2</sub> and atmospheric pressure sensor, that maintains a comfortable environment for human beings or to prevent discomfort. The sensor module is the transmitter which delivers the sensor data to the receiver and

the receiver will transmit the filtered or recovered sensor data to a microcontroller board in monitoring the room environment. The room monitoring system is able to provide a comfortable environment for human beings through the wireless sensor network or WSN for monitoring the room environment.

## 2.6 Air Quality Standards

This review shows the different indoor air quality standards set by different countries across the world. The data is collected from documents from different health and environmental organization. This paper can be set as a tool for evaluating acceptable concentrations of different pollutants within an area. The pollutants included in this study are "carbon dioxide (CO<sub>2</sub>), carbon monoxide (CO), formaldehyde (HCHO), nitrogen dioxide (NO<sub>2</sub>), sulfur dioxide (SO<sub>2</sub>), total volatile organic compounds (TVOCs) and particulate matter (PM<sub>2.5</sub> and PM<sub>10</sub>).” The amount allowable depends on how bad the amount of a certain pollutant exists indoors. The paper also explains different harmful health effects each pollutant has on the human body.

### 3.1 Microcontroller based temperature humidity meter using Arduino Platform

Arduino is one of the many micro-controller based systems that can be utilized to measure temperature and humidity level. It is a combination of hardware and software computer architecture system that has already made into several versions of small size chipsets. Both of these versions can be used along with the humidity and temperature sensors to detect temperature and humidity in the environment. Temperature and humidity level may vary depends on the locations since every different location are affected by various environments. Different time also affects the result due to the weather change and location of the sun in the sky. The Arduino microcontroller system implemented together with the sensor on a device like a portable temperature and humidity meter. The device used and temperature and humidity sensor must have a physical connection and battery for the power supply. The Arduino device will present the data into a LCD display, in order to make it easier for users to read the humidity and temperature levels.

### 3.2 Discomfort Index

Discomfort index refer to impact of heat and stress on the individual taking account the combined effect of temperature and humidity. This index is used as a standard to inform the user whether their respective places are not comfortable or good enough for an activity. Several temperature and humidity levels will be gathered in order to give a more accurate discomfort index as a result. Proper gathering of temperature and humidity level data is necessary to fulfill the purpose of the discomfort index. It is important for student to know

548 which location at the campus is uncomfortable because stress caused by the environments  
549 affects the welfare of the students at school.

### 550 **3.3 Bluetooth Technology**

551 Bluetooth is a wireless communication technology. This technology deals with the regula-  
552 tion of the flow of data. Data transmission is done through the wireless communication in  
553 this technology there are paired two devices and these devices can communicate to each  
554 other through Bluetooth. After the pairing of devices, there is a process of data transfer.  
555 It is a bidirectional technology since it is capable of sending and receiving data. It has a  
556 limited transmission distance between the two devices and it cannot transmit data in far  
557 distances. The temperature and humidity data from the Arduino device can be transferred  
558 into the android application in terms of wireless Bluetooth communication as indicated  
559 above information.

### 560 **3.4 Comfortability indicator application at De La Salle** 561 **university using Android platform**

562 Android is one of the operating system programs that can be used in various purposes. This  
563 operating system already has several versions such as Ginger Bread, Ice Cream Sandwich,  
564 Jelly Bean, KitKat and Marshmallow. All these versions are compatible with the android  
565 operating system to show the comfortability indicator. Marshmallow is the latest version  
566 and it has the more functions than the older versions but most phones do not support this  
567 version yet. older version of android will be used since it is the version where a lot of

568 students are using it right now. The Comfortability Indicator application will based it on  
569 the temperature and humidity data gathered in the Arduino device and it will display the  
570 heat map to indicate which area is comfortable and which are not. The students will have  
571 information about the discomfort index and the effect of heat and stress to their health and  
572 welfare.

## 4.1 Summary

According to the system model, the project will make use of an Arduino microcontroller system that will handle tasks of gathering inputs which are the temperature, humidity, amount of dust, and amount of carbon monoxide. These data will be transmitted an Android system. Afterwards, this data can be submitted to the Android cloud in real time. Each individual Android system in the cloud can make use of the camera to capture the image of the surroundings in order to get the visibility with the aid of computer vision. A crowdsourcing element is considered to be added in each system where the user can rank the amount of discomfort he feels in terms of the heat and air pollution. This information will be utilized in the cloud.

The current accomplishments for the group is the successful gathering of the temperature and humidity with the use of the Arduino system and the DHT-11 sensor. These values are rounded to the nearest units value.

## 5.1 Implementation

The group has chosen system prototyping as the primary methodology of the study Fig. 5.1. It is effective to use this because Arduino is quick to learn and would be useful in creating prototypes easily. It will also be advantageous to follow this methodology because of the time constraint and weekly updates. This would, however, not be very effective in terms of developing an Android application with a crowdsourcing element and bluetooth communications due to its unfamiliarity to the group.

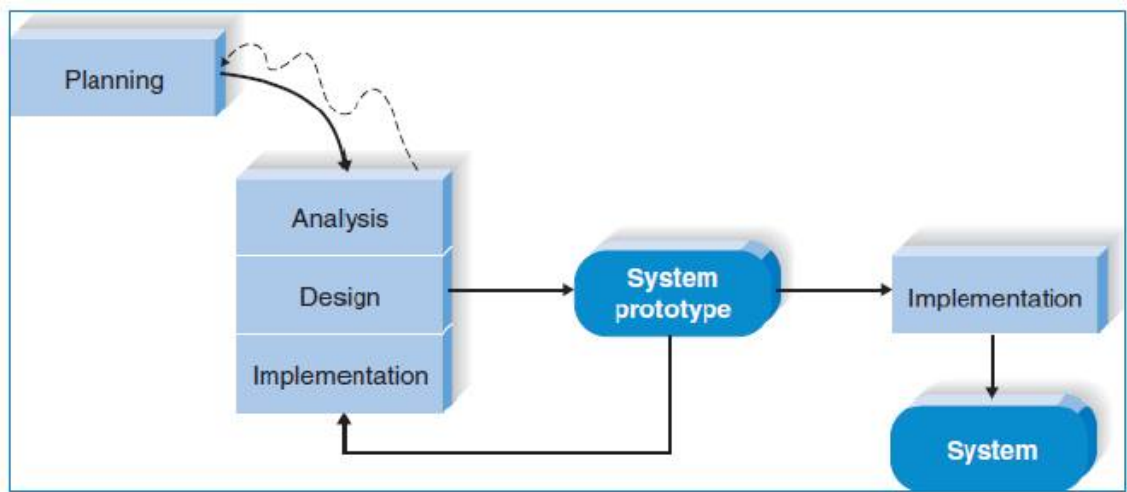

Fig. 5.1 System Prototyping Diagram

### 5.1.1 Planning

The planning stage took around four weeks. In the planning stage, several factors of air quality was taken into consideration. Among these factors are temperature, humidity, dust, and amount of Carbon Monoxide. In creating this design, few more considerations must be accounted for. Among these are portability, Android compatibility, and real time. Different

646 stages must take place in creating the proposed system. These stages will consist of the  
647 integration of the different sensors to our design, testing and evaluating these sensors, and  
648 integrating them in the Android application.

### 649 **5.1.2 Initial Prototype**

650 For the initial prototype, the temperature and humidity are first taken into consideration. The  
651 design will include the DHT11 humidity sensor and an LED display to provide feedback on  
652 the current temperature and humidity as well as the discomfort index of the area. Several  
653 sets of data are first taken in order to retrieve the temperature and humidity. This is done in  
654 order to check the consistency and accuracy of the measuring devices used for comparing  
655 the data collected from our design. The data is taken from 3 different days with 2 analog  
656 and 1 digital sensor. The prototype will make use of the DHT11 sensor and its accuracy  
657 will be tested using the best thermometer and hygrometer.

### 658 **5.1.3 Second Prototype**

659 More features are added in the initial prototype. These will include bluetooth communica-  
660 tions with the Android app as well as integrating crowdsourcing using FireBase. This will  
661 also include the SDS011 particulate matter laser sensor which measures the concentration  
662 of dust present locally. The use of this sensor will have a relative error of 10% . This error  
663 will be tested by comparing the results to a DustTrak or GRIMM dust monitor.

#### 5.1.4 Final Prototype

Using MQ-7 CO sensor, the prototype will be further extended. The range will be from 10 to 500 ppm which is sufficient to determine how harmful the amount is. This too will be compared to an existing CO meter which will be used to measure the reliability of the sensor. The final prototype will also include the integration of visibility detection. The visibility detection will make use of OpenCV by making use of Canny Edge Detection. The prototype will also finalize the Android application's features and design.

#### 5.1.5 Integration of Communication Devices

The data transferred will not only be transferred to the proposed Android application but also to a cloud. This will involve crowdsourcing which would enable several data to be inputted at real time. To transfer the data from the proposed system to the Android application, the SMiRF Bluetooth module or HC-05 Bluetooth module will be used. The data collected will then be transferred to a Firebase database.

### 5.2 Evaluation

The study is to develop a mobile phone application that utilizes the use of a microcontroller-based system to measure air parameters in getting the discomfort index and amount of air pollutants. The discomfort index is dependent on air parameters measured by the system. In relation to the air parameters, the study uses a quantitative approach of data gathering, through actual measurements of air parameters using analog and digital meters and sensors. A crowdsourcing approach was then applied for better information gathering between the users of the applications across the map.

### 5.2.1 Quantitative Approach

Data were gathered four nonconsecutive trials on twenty different locations along De La Salle University. The data collected consists of the measurements of the available meters, one digital and two analog meters, and the measurements of the actual sensors used on the system. The time and date, when the data were taken, were also recorded due to the fact that the parameters greatly vary on the weather and the time it was measured which also leads to inconsistent recorded data.

The gathered data were used to determine the reliability of the measurements from the sensors used in the system, in resemblance to the measurements from the meters. The use of the meters are for establishing the ground truth of the measurements of air parameters. Also, the data were ranked according to their corresponding computed level of discomfort or discomfort index based on the parameters measured using both the meters and the sensors.

### 5.2.2 Crowdsourcing Approach

Due to the fact that the data can only be collected when the user is at the specified location, the android application used in this study integrates a crowdsourcing approach in gathering of data. In this way, the user can be aware of the conditions of the air parameters around a location on the map based on the data from the other users that are in the location.

The application is capable of sharing or storing information in a cloud for crowdsourcing. The cloud is used to hold the data from all the information stored by each user of the application. The crowdsourcing application is very dependent on the user's data and it would be most effective when more people use the application. This approach allows the user to gather information and at the same time, contributes to the cloud-based system of

707 the application which also contributes to the data gathering of other users.

### 708 **5.3 Summary**

709 The proposed design will contain several sensors that will measure temperature, humidity,  
710 particulate matter amount, and levels of carbon dioxide. There are different stages in  
711 gathering the various data required. The sensors will be calibrated based from its individual  
712 datasheets. The data will be taken in a span of two weeks and at different times throughout  
713 the day. The data taken from our design will be compared with commercial sensors that are  
714 readily available to test the reliability and consistency of the proposed design.

715 The data collected from DHT11 sensor for detecting temperature and humidity will  
716 be measured. The design will also use a SDS011 PM laser sensor to record the amount  
717 of dust present within its range. The MQ-7 CO sensor will record the concentrations of  
718 Carbon Monoxide in its vicinity. The range will be from 10 to 500 ppm which is sufficient  
719 to determine how harmful the amount of Carbon Monoxide is. These will be tested with  
720 their corresponding meters and its accuracy will be determined. The data collected will  
721 be sent to a database in a cloud and transferred to the Android application. The program  
722 within the application will handle the discomfort index calculation and will determine level  
723 of discomfort.

## 840 7.4 Future Prospects

841 There are several prospect related in this research that may be extended for further studies.  
 842 ... So the suggested topics are listed in the following.

843 1. the ....

844 2. the ....

845 3. the ....

# Appendix A

## ANSWERS TO QUESTIONS TO THIS THESIS

### Contents

A1	How important is the problem to practice? . . . . .	42
A2	How will you know if the solution/s that you will achieve would be better than existing ones? . . . . .	42
A2.1	How will you measure the improvement/s? . . . . .	42
A2.1.1	What is/are your basis/bases for the improvement/s? . .	43
A2.1.2	Why did you choose that/those basis/bases? . . . . .	43
A2.1.3	How significant are your measure/s of the improvement/s? .	43
A3	What is the difference of the solution/s from existing ones? . . . . .	44
A3.1	How is it different from previous and existing ones? . . . . .	44
A4	What are the assumptions made (that are behind for your proposed solution to work)? . . . . .	44
A4.1	Will your proposed solution/s be sensitive to these assumptions? .	45
A4.2	Can your proposed solution/s be applied to more general cases when some of the assumptions are eliminated? If so, how? . . . .	45
A5	What is the necessity of your approach / proposed solution/s? . . . . .	45
A5.1	What will be the limits of applicability of your proposed solution/s? .	46
A5.2	What will be the message of the proposed solution to technical people? How about to non-technical managers and business men? .	46
A6	How will you know if your proposed solution/s is/are correct? . . . . .	46
A6.1	Will your results warrant the level of mathematics used (i.e., will the end justify the means)? . . . . .	47
A7	Is/are there an/_ alternative way/s to get to the same solution/s? . . . . .	47
A7.1	Can you come up with illustrating examples, or even better, counter examples to your proposed solution/s? . . . . .	47
A7.2	Is there an approximation that can arrive at the essentially the same proposed solution/s more easily? . . . . .	48
A8	If you were the examiner of your proposal, how would you present the proposal in another way? . . . . .	48
A8.1	What are the weaknesses of your proposal? . . . . .	48

913

## A1 How important is the problem to practice?

914 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 915 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 916 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 917 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 918 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 919 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 920 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 921 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 922 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

923

## A2 How will you know if the solution/s that you will achieve would be better than existing ones?

924

925 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 926 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 927 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 928 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 929 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 930 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 931 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 932 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 933 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

934

### A2.1 How will you measure the improvement/s?

935 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 936 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 937 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 938 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 939 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 940 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 941 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 942 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 943 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

944 **A2.1.1 What is/are your basis/bases for the improvement/s?**

945 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 946 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 947 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 948 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 949 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 950 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 951 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 952 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 953 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

954 **A2.1.2 Why did you choose that/those basis/bases?**

955 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 956 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 957 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 958 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 959 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 960 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 961 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 962 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 963 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

964 **A2.1.3 How significant are your measure/s of the improvement/s?**

965 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
 966 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
 967 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
 968 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
 969 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
 970 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
 971 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
 972 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
 973 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

974

975

### **A3 What is the difference of the solution/s from existing ones?**

Nunc quis urna dictum turpis accumsan semper.

#### **A5 What is the necessity of your approach / proposed solution/s?**

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.

1038 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1039 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1040 **A5.1 What will be the limits of applicability of your proposed so-**  
1041 **lution/s?**

1042 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
1043 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
1044 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
1045 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
1046 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
1047 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
1048 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
1049 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1050 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1051 **A5.2 What will be the message of the proposed solution to**  
1052 **technical people? How about to non-technical managers**  
1053 **and business men?**

1054 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
1055 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
1056 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
1057 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
1058 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
1059 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
1060 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
1061 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1062 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1063 **A6 How will you know if your proposed solution/s**  
1064 **is/are correct?**

1065 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
1066 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
1067 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
1068 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
1069 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla

1070 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
1071 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
1072 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1073 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1074 **A6.1 Will your results warrant the level of mathematics used**  
1075 **(i.e., will the end justify the means)?**

1076 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
1077 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
1078 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
1079 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
1080 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
1081 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
1082 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
1083 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1084 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1085 **A7 Is/are there an/\_ alternative way/s to get to the**  
1086 **same solution/s?**

1087 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem.  
1088 Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec  
1089 ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus  
1090 placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor.  
1091 Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla  
1092 tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue  
1093 a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris.  
1094 Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit  
1095 amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1096 **A7.1 Can you come up with illustrating examples, or even bet-**  
1097 **ter, counter examples to your proposed solution/s?**

## **Appendix B**

1140

## **USAGE EXAMPLES**

The user is expected to have a working knowledge of  $\text{\LaTeX}$ . A good introduction is in [Oetiker et al., 2014]. Its latest version can be accessed at <http://www.ctan.org/tex-archive/info/lshort>.

## B1 Equations

The following examples show how to typeset equations in  $\text{\LaTeX}$ . This section also shows examples of the use of `\gls{ }` commands in conjunction with the items that are in the `notation.tex` file. **Please make sure that the entries in `notation.tex` are those that are referenced in the  $\text{\LaTeX}$  document files used by this Thesis. Please comment out unused notations and be careful with the commas and brackets in `notation.tex`.**

In (B.1), the output signal  $y(t)$  is the result of the convolution of the input signal  $x(t)$  and the impulse response  $h(t)$ .

$$y(t) = h(t) * x(t) = \int_{-\infty}^{+\infty} h(t - \tau) x(\tau) d\tau \quad (\text{B.1})$$

Other example equations are as follows.

$$\begin{bmatrix} V_1 \\ I_1 \end{bmatrix} = \begin{bmatrix} A & B \\ C & D \end{bmatrix} \begin{bmatrix} V_2 \\ I_2 \end{bmatrix} \quad (\text{B.2})$$

$$\frac{1}{2} < \left\lfloor \text{mod} \left( \left\lfloor \frac{y}{17} \right\rfloor 2^{-17\lfloor x \rfloor - \text{mod}(\lfloor y \rfloor, 17)}, 2 \right) \right\rfloor, \quad (\text{B.3})$$

$$|\zeta(x)^3 \zeta(x + iy)^4 \zeta(x + 2iy)| = \exp \sum_{n,p} \frac{3 + 4 \cos(ny \log p) + \cos(2ny \log p)}{np^{nx}} \geq 1 \quad (\text{B.4})$$

1154

The verbatim  $\text{\LaTeX}$  code of Sec. B1 is in List. B.1.

Listing B.1: Sample  $\text{\LaTeX}$  code for equations and notations usage

```

1 The following examples show how to typeset equations in \LaTeX.
2
3 In~\eqref{eq:conv}, the output signal \gls{not:output_sigt} is the
  result of the convolution of the input signal \gls{not:input_sigt}
  and the impulse response \gls{not:ir}.
4
5 \begin{eqnarray}
6   y\left( t \right) = h\left( t \right) * x\left( t \right)=\int_{-\infty}^{+\infty}h\left( t-\tau \right)x\left( \tau \right) \mathrm{d}\tau
7   \label{eq:conv}
8 \end{eqnarray}
9
10 Other example equations are as follows.
11
12 \begin{eqnarray}
13   \left[ \dfrac{V_{1}}{I_{1}} \right] =
14   \begin{bmatrix}
15     A & B \\
16     C & D
17   \end{bmatrix}
18   \left[ \dfrac{V_{2}}{I_{2}} \right]
19   \label{eq:ABCD}
20 \end{eqnarray}
21
22 \begin{eqnarray}
23   \{1\over 2\} < \left\lfloor \mathrm{mod}\right\left(\left\lfloor y \over 17\right\right\rfloor 2^{\{-17\lfloor x \rfloor - \mathrm{mod}(\lfloor y \rfloor, 17)\}}, 2\right)\right\rfloor,
24 \end{eqnarray}
25
26 \begin{eqnarray}
27   \left| \zeta(x)^3\zeta(x+iy)^4\zeta(x+2iy) \right| =
28   \exp\sum_{n,p}\frac{3+4\cos(ny\log p) +\cos(2ny\log p)}{\{n^p\}}\geq 1
29 \end{eqnarray}

```

## B2 Notations

In order to use the standardized notation, the user is highly suggested to see the ISO 80000-2 standard [ISO, 2009]. The following were taken from `isomath-test.tex`.

### Math alphabets

If there are other symbols in place of Greek letters in a math alphabet, it uses T1 or OT1 font encoding instead of OML.

<code>mathnormal</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$
<code>mathit</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \textit{ff}, \textit{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathrm</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \text{ff}, \text{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathbf</code>	$\mathbf{A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, ff, fi, \beta, ^\circ, !, v, w, 0, 1, 9}$
<code>mathsf</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \text{ff}, \text{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathtt</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \uparrow, \downarrow, \beta, ^\circ, !, v, w, 0, 1, 9$

New alphabets bold-italic, sans-serif-italic, and sans-serif-bold-italic.

<code>mathbfit</code>	$\mathbf{A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9}$
<code>mathsf</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$
<code>mathsfbfit</code>	$\mathbf{A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9}$

Do the math alphabets match?

$\alpha x \alpha \omega \mathbf{a x \alpha \omega a x \alpha \omega} \quad T C \Theta \Gamma T C \Theta \Gamma T C \Theta \Gamma$

### Vector symbols

Alphabetic symbols for vectors are boldface italic,  $\lambda = e_1 \cdot \mathbf{a}$ , while numeric ones (e.g. the zero vector) are bold upright,  $\mathbf{a} + \mathbf{0} = \mathbf{a}$ .

### Matrix symbols

Symbols for matrices are boldface italic, too:<sup>1</sup>  $\mathbf{A} = \mathbf{E} \cdot \mathbf{A}$ .

<sup>1</sup>However, matrix symbols are usually capital letters whereas vectors are small ones. Exceptions are physical quantities like the force vector  $\mathbf{F}$  or the electrical field  $\mathbf{E}$ .

1169

**Tensor symbols**

1170

Symbols for tensors are sans-serif bold italic,

$$\boldsymbol{\alpha} = \boldsymbol{e} \cdot \boldsymbol{a} \quad \Longleftrightarrow \quad \alpha_{ijl} = e_{ijk} \cdot a_{kl}.$$

1171

The permittivity tensor describes the coupling of electric field and displacement:

$$\boldsymbol{D} = \epsilon_0 \boldsymbol{\epsilon}_r \boldsymbol{E}$$

## Bold math version

The “bold” math version is selected with the commands `\boldmath` or `\mathversion{bold}`

<code>mathnormal</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$
<code>mathit</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \textit{ff}, \textit{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathrm</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \text{ff}, \text{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathbf</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \text{ff}, \text{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathsf</code>	$\mathbf{A}, \mathbf{B}, \mathbf{\Gamma}, \mathbf{\Delta}, \mathbf{\Theta}, \mathbf{\Lambda}, \mathbf{\Xi}, \mathbf{\Pi}, \mathbf{\Sigma}, \mathbf{\Phi}, \mathbf{\Psi}, \mathbf{\Omega}, \text{ff}, \text{fi}, \beta, ^\circ, !, v, w, 0, 1, 9$
<code>mathtt</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \uparrow, \downarrow, \beta, ^\circ, !, v, w, 0, 1, 9$

New alphabets bold-italic, sans-serif-italic, and sans-serif-bold-italic.

<code>mathbfit</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$
<code>mathsfit</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$
<code>mathsfbfit</code>	$A, B, \Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega, \alpha, \beta, \pi, \nu, \omega, v, w, 0, 1, 9$

Do the math alphabets match?

$\alpha x \alpha \omega a x \alpha \omega a x \alpha \omega \quad TC\Theta\Gamma TC\Theta\Gamma TC\Theta\Gamma$

## Vector symbols

Alphabetic symbols for vectors are boldface italic,  $\lambda = e_1 \cdot a$ , while numeric ones (e.g. the zero vector) are bold upright,  $a + 0 = a$ .

## Matrix symbols

Symbols for matrices are boldface italic, too:<sup>2</sup>  $\Lambda = E \cdot A$ .

## Tensor symbols

Symbols for tensors are sans-serif bold italic,

$$\alpha = e \cdot a \iff \alpha_{ijl} = e_{ijk} \cdot a_{kl}.$$

The permittivity tensor describes the coupling of electric field and displacement:

$$D = \epsilon_0 \epsilon_r E$$

<sup>2</sup>However, matrix symbols are usually capital letters whereas vectors are small ones. Exceptions are physical quantities like the force vector  $F$  or the electrical field  $E$ .

```

## B3 Abbreviation

This section shows examples of the use of  $\LaTeX$  commands in conjunction with the items that are in the `abbreviation.tex` and in the `glossary.tex` files. Please see List. B.3. **To lessen the  $\LaTeX$  compilation time, it is suggested that you use `\acr{ }` only for the first occurrence of the word to be abbreviated.**

Again please see List. B.3. Here is an example of first use: alternating current (ac). Next use: ac. Full: alternating current (ac). Here's an acronym referenced using `\acr` : hyper-text markup language (html). And here it is again: html. If you are used to the glossaries package, note the difference in using `\gls` : hyper-text markup language (html). And again (no difference): hyper-text markup language (html). Here are some more entries:

- extensible markup language (xml) and cascading style sheet (css).
- Next use: xml and css.
- Full form: extensible markup language (xml) and cascading style sheet (css).
- Reset again.
- Start with a capital. Hyper-text markup language (html).
- Next: Html. Full: Hyper-text markup language (html).
- Prefer capitals? Extensible markup language (XML). Next: XML. Full: extensible markup language (XML).
- Prefer small-caps? Cascading style sheet (CSS). Next: CSS. Full: cascading style sheet (CSS).
- Resetting all acronyms.
- Here are the acronyms again:
- Hyper-text markup language (HTML), extensible markup language (XML) and cascading style sheet (CSS).
- Next use: HTML, XML and CSS.
- Full form: Hyper-text markup language (HTML), extensible markup language (XML) and cascading style sheet (CSS).

- 1374 • Provide your own link text: style sheet.

1375 The verbatim  $\text{\LaTeX}$  code of Sec. B3 is in List. B.3.

### Listing B.3: Sample $\text{\LaTeX}$ code for abbreviations usage

```

1 Again please see List.~\ref{lst:abbrv}. Here is an example of first use:
   \acr{ac}. Next use: \acr{ac}. Full: \gls{ac}. Here's an acronym
   referenced using \verb| \acr |: \acr{html}. And here it is again: \
   acr{html}. If you are used to the \texttt{glossaries} package, note
   the difference in using \verb| \gls |: \gls{html}. And again (no
   difference): \gls{html}. Here are some more entries:
2
3 \begin{itemize}
4
5   \item \acr{xml} and \acr{css}.
6
7   \item Next use: \acr{xml} and \acr{css}.
8
9   \item Full form: \gls{xml} and \gls{css}.
10
11  \item Reset again. \glsresetall{abbreviation}
12
13  \item Start with a capital. \Acr{html}.
14
15  \item Next: \Acr{html}. Full: \Gls{html}.
16
17  \item Prefer capitals? \renewcommand{\acronymfont}[1]{\
   MakeTextUppercase{#1}} \Acr{xml}. Next: \acr{xml}. Full: \gls{xml}
   }.
18
19  \item Prefer small-caps? \renewcommand{\acronymfont}[1]{\textsc{#1}}
   \Acr{css}. Next: \acr{css}. Full: \gls{css}.
20
21  \item Resetting all acronyms.\glsresetall{abbreviation}
22
23  \item Here are the acronyms again:
24
25  \item \Acr{html}, \acr{xml} and \acr{css}.
26
27  \item Next use: \Acr{html}, \acr{xml} and \acr{css}.
28
29  \item Full form: \Gls{html}, \gls{xml} and \gls{css}.
30
31  \item Provide your own link text: \glslink{[textbf]css}{style}
32
33 \end{itemize}

```

## B4 Glossary

This section shows examples of the use of `\gls{ }` commands in conjunction with the items that are in the `glossary.tex` and `notation.tex` files. Note that entries in `notation.tex` are prefixed with “not:” label (see List. B.4).

**Please make sure that the entries in `notation.tex` are those that are referenced in the  $\LaTeX$  document files used by this Thesis. Please comment out unused notations and be careful with the commas and brackets in `notation.tex` .**

- Matrices are usually denoted by a bold capital letter, such as  $A$ . The matrix’s  $(i, j)$ th element is usually denoted  $a_{ij}$ . Matrix  $I$  is the identity matrix.
- A set, denoted as  $S$ , is a collection of objects.
- The universal set, denoted as  $\mathcal{U}$ , is the set of everything.
- The empty set, denoted as  $\emptyset$ , contains no elements.
- The cardinality of a set, denoted as  $|S|$ , is the number of elements in the set.

The verbatim  $\LaTeX$  code for the part of Sec. B4 is in List. B.4.

Listing B.4: Sample  $\LaTeX$  code for glossary and notations usage

```

1 \begin{itemize}
2
3   \item \Glspl{matrix} are usually denoted by a bold capital letter,
      such as  $\mathbf{A}$ . The  $\gls{matrix}$ ’s  $(i, j)$ th element is
      usually denoted  $a_{ij}$ .  $\Gls{matrix}$   $\mathbf{I}$  is the
      identity  $\gls{matrix}$ .
4
5   \item A set, denoted as  $\gls{not:set}$ , is a collection of objects.
6
7   \item The universal set, denoted as  $\gls{not:universalSet}$ , is the
      set of everything.
8
9   \item The empty set, denoted as  $\gls{not:emptySet}$ , contains no
      elements.
10
11   \item The cardinality of a set, denoted as  $\gls{not:cardinality}$ , is
      the number of elements in the set.
12
13 \end{itemize}
```

## B6 Table

This section shows an example of placing a table (a long one). Table B.1 are the triples.

TABLE B.1 FEASIBLE TRIPLES FOR HIGHLY VARIABLE GRID

Time (s)	Triple chosen	Other feasible triples
0	(1, 11, 13725)	(1, 12, 10980), (1, 13, 8235), (2, 2, 0), (3, 1, 0)
2745	(1, 12, 10980)	(1, 13, 8235), (2, 2, 0), (2, 3, 0), (3, 1, 0)
5490	(1, 12, 13725)	(2, 2, 2745), (2, 3, 0), (3, 1, 0)
8235	(1, 12, 16470)	(1, 13, 13725), (2, 2, 2745), (2, 3, 0), (3, 1, 0)
10980	(1, 12, 16470)	(1, 13, 13725), (2, 2, 2745), (2, 3, 0), (3, 1, 0)
13725	(1, 12, 16470)	(1, 13, 13725), (2, 2, 2745), (2, 3, 0), (3, 1, 0)
16470	(1, 13, 16470)	(2, 2, 2745), (2, 3, 0), (3, 1, 0)
19215	(1, 12, 16470)	(1, 13, 13725), (2, 2, 2745), (2, 3, 0), (3, 1, 0)

**B7 Algorithm or Pseudocode Listing**

1510

Table B.2 shows an example pseudocode. Note that if the pseudocode exceeds one page, it can mean that its implementation is not modular. List. B.9 shows the corresponding L<sup>A</sup>T<sub>E</sub>X code.

1511

1512

TABLE B.2 CALCULATION OF  $y = x^n$

<b>Input(s):</b>	
$n$	: $n$ th power; $n \in \mathbb{Z}^+$
$x$	: base value; $x \in \mathbb{R}^+$
<b>Output(s):</b>	
$y$	: result; $y \in \mathbb{R}^+$

**Require:**  $n \geq 0 \vee x \neq 0$

**Ensure:**  $y = x^n$

```
1:  $y \leftarrow 1$ 
2: if  $n < 0$  then
3:    $X \leftarrow 1/x$ 
4:    $N \leftarrow -n$ 
5: else
6:    $X \leftarrow x$ 
7:    $N \leftarrow n$ 
8: end if
9: while  $N \neq 0$  do
10:  if  $N$  is even then
11:     $X \leftarrow X \times X$ 
12:     $N \leftarrow N/2$ 
13:  else { $N$  is odd}
14:     $y \leftarrow y \times X$ 
15:     $N \leftarrow N - 1$ 
16:  end if
17: end while
```

## B8 Program/Code Listing

List. B.10 is a program listing of a C code for computing Fibonacci numbers by calling the actual code. Please see the `code` subdirectory.

Listing B.10: Computing Fibonacci numbers in C (./code/fibo.c)

```

1  /* fibo.c -- It prints out the first N Fibonacci
2  *              numbers.
3  */
4
5  #include <stdio.h>
6
7  int main(void) {
8      int n;          /* Number of fibonacci numbers we will print */
9      int i;          /* Index of fibonacci number to be printed next */
10     int current;     /* Value of the (i)th fibonacci number */
11     int next;        /* Value of the (i+1)th fibonacci number */
12     int twoaway;     /* Value of the (i+2)th fibonacci number */
13
14     printf("How many Fibonacci numbers do you want to compute? ");
15     scanf("%d", &n);
16     if (n<=0)
17         printf("The number should be positive.\n");
18     else {
19         printf("\n\n\tI\t\tFibonacci(I)\t\n\t===== \n");
20         next = current = 1;
21         for (i=1; i<=n; i++) {
22             printf("\t%d\t\t\t%d\n", i, current);
23             twoaway = current+next;
24             current = next;
25             next = twoaway;
26         }
27     }
28 }
29
30 /* The output from a run of this program was:
31
32 How many Fibonacci numbers do you want to compute? 9
33
34     I      Fibonacci(I)
35     =====
36     1      1

List. B.11 shows the corresponding  $\text{\LaTeX}$  code.

Listing B.11: Sample  $\text{\LaTeX}$  code for program listing

```
1 List.~\ref{lst:fib_c} is a program listing of a C code for computing  
Fibonacci numbers by calling the actual code. Please see the \verb|  
code | subdirectory.
```

## B9 Referencing

Referencing chapters: This appendix is in Appendix B, which is about examples in using various  $\LaTeX$  commands.

Referencing sections: This section is Sec. B9, which shows how to refer to the locations of various labels that have been placed in the  $\LaTeX$  files. List. B.12 shows the corresponding  $\LaTeX$  code.

Listing B.12: Sample  $\LaTeX$  code for referencing sections

```
1 Referencing sections: This section is Sec.~\ref{sec:ref}, which shows
   how to refer to the locations of various labels that have been
   placed in the \LaTeX \ files. List.~\ref{lst:refsec} shows the
   corresponding \LaTeX \ code.
```

## B10 Index

For key words or topics that are expected (or the user would like) to appear in the Index, use `\index{key}`, where `key` is an example keyword to appear in the Index. For example, Fredholm integral and Fourier operator of the following paragraph are in the Index.

If we make a very large matrix with complex exponentials in the rows (i.e., cosine real parts and sine imaginary parts), and increase the resolution without bound, we approach the kernel of the Fredholm integral equation of the 2nd kind, namely the Fourier operator that defines the continuous Fourier transform.

List. B.15 is a program listing of the above-mentioned paragraph.

Listing B.15: Sample  $\text{\LaTeX}$  code for Index usage

```
1 If we make a very large matrix with complex exponentials in the rows (i.
  e., cosine real parts and sine imaginary parts), and increase the
  resolution without bound, we approach the kernel of the \index{
  Fredholm integral} Fredholm integral equation of the 2nd kind,
  namely the \index{Fourier} Fourier operator that defines the
  continuous Fourier transform.
```

## B11 Adding Relevant PDF Pages (e.g. Standards, Datasheets, Specification Sheets, Application Notes, etc.)

Selected PDF pages can be added (see List. B.16), but note that the options must be tweaked. See the manual of `pdfpages` for other options.

Listing B.16: Sample  $\text{\LaTeX}$  code for including PDF pages

```
1 \includepdf[pages={8-10},%
2 offset=3.5mm -10mm,%
3 scale=0.73,%
4 frame]
5 {./reference/Xilinx2015-UltraScaleArchitectureOverview.pdf}
```

## Virtex UltraScale FPGA Feature Summary

FLGA2892	55x55							52, 1404 48, 0

**Notes:**

1. Go to [Ordering Information](#) for package designation details.
2. All packages have 1.0mm ball pitch.
3. Packages with the same last letter and number sequence, e.g., A2104, are footprint compatible with all other UltraScale architecture-based devices with the same sequence. The footprint compatible devices within this family are outlined. See the [UltraScale Architecture Product Selection Guide](#) for details on inter-family migration.

## Virtex UltraScale+ FPGA Feature Summary

100G Ethernet w/RS-FEC	3	4	6	9	6	8

**Notes:**

1. HP = High-performance I/O with support for I/O voltage from 1.0V to 1.8V.

## Virtex UltraScale+ Device-Package Combinations and Maximum I/Os

Table 9: Virtex UltraScale+ Device-Package Combinations and Maximum I/Os

Package (1)(2)(3)	Package Dimensions (mm)	VU3P	VU5P	VU7P	VU9P	VU11P	VU13P
		HP, GTY	HP, GTY	HP, GTY	HP, GTY	HP, GTY	HP, GTY
FFVC1517	40x40	520, 40					
FLVF1924	45x45					624, 64	
FLVA2104	47.5x47.5		832, 52	832, 52	832, 52		
FHVA2104	52.5x52.5 <sup>(4)</sup>						832, 52
FLVB2104	47.5x47.5		702, 76	702, 76	702, 76	624, 76	
FHVB2104	52.5x52.5 <sup>(4)</sup>						702, 76
FLVC2104	47.5x47.5		416, 80	416, 80	416, 104	416, 96	
FHVC2104	52.5x52.5 <sup>(4)</sup>						416, 104
FLVA2577	52.5x52.5				448, 120	448, 96	448, 128

**Notes:**

1. Go to [Ordering Information](#) for package designation details.
2. All packages have 1.0mm ball pitch.
3. Packages with the same last letter and number sequence, e.g., A2104, are footprint compatible with all other UltraScale devices with the same sequence. The footprint compatible devices within this family are outlined.
4. These 52.5x52.5mm overhang packages have the same PCB ball footprint as the corresponding 47.5x47.5mm packages (i.e., the same last letter and number sequence) and are footprint compatible.

## Appendix D VITA

Junlae Cheong is a sixth year student at De La Salle University. He is currently taking up his B.Sc. Computer Engineering studies. His strengths in the field are electronics circuit design and configuration. His fields of interest are electronics hardware and computer microprocessor.

Rohit P. Nihalani is a third year student at De La Salle University. He is currently taking up his B.Sc. Computer Engineering studies. He has designed communication systems which covers basic AM radios. His fields of interest are digital communications and computer networks.

Noel B. Paulino is a third year student at De La Salle University. He is currently taking up his B.Sc. Computer Engineering studies. His strengths in the field are microcontroller program design and advanced electronics.

Ryback Tyrone G. Po is a fourth year student at De La Salle University. He is currently taking up his B.Sc. Computer Engineering studies. He has designed and

1602  
1603

programmed electronic circuits that includes microcontrollers. His strengths in the field are microcontroller simulation and programming.
